Application Deployment and User Guide

Introduction

This application has three users:

Candidate - Takes a questionnaire and based on their answers they will be recommended a role and a secondary role along with a department
Staff - View anonymised data from questionnaires taken in a graph
**Admin** - Manage staff accounts and questions
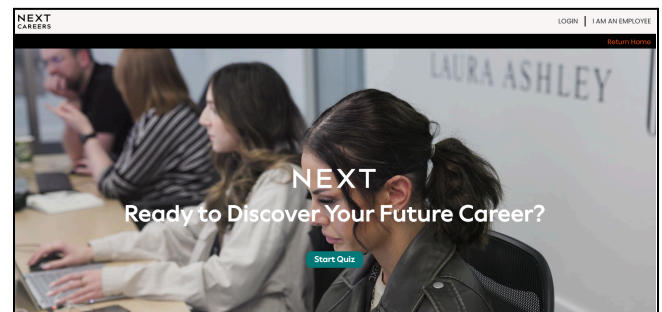

Set up

Using program

Landing page

The landing page is the first page all users go to when entering the website.
If this is the first time the user is entering the website they have to accept or decline cookies.

Candidate, Staff and Admin can login to their account and their is a button to navigate to the questionnaire

Guest

Questionnaire

When the start questionnaire button is clicked the guest is directed to the questionnaire which contains two sections.

1) Range-based questions - These questions help to suggest the user a department

2) Text-answer questions
   These questions point to a more specific role

Results

Once the guest has completed the questionnaire they are directed to the results page which suggests them a primary and two secondary roles along with a department.

On this page they can choose to create an account to save their results or they can leave without creating an account

Registration

If the guest decides to create an account they are provided with this form to enter their details. All fields of the form must be filled in for the account to be created.

Once the account is created they are sent to the login page.

Candidate

Login

When the candidate is on the login page they enter their email and password.
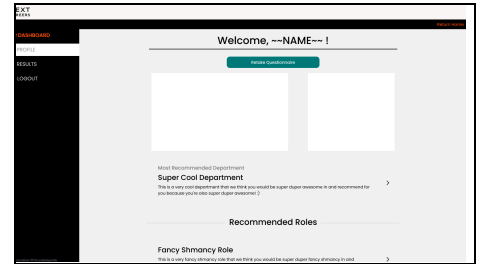

Dashboard

Once logged in the candidate is directed to the dashboard which allows them to see their results from taking the questionnaire

Profile Management

Candidates can manage their profile when they select "profile" on the navigation menu. Once on this page they can see their details and have the option to edit or delete their account. Which follows GDPR regulations.
Staff

Login

Staff members are provided with a premade account. They enter these details to access the staff dashboard

Dashboard

Once logged in staff are directed to the main dashboard page where they can view a chart with the department and their levels of popularity which is based on how often that department is recommended.

Admin

Admin has all the functionalities staff members have with a few additional features listed below.

Manage Staff

From the dashboard navigation menu the admin can access the staff page. This page displays an index of all staff members with three options.
- View a selected staff information
- Update the selected staff account details
- Delete the selected staff account

Manage Questions

Additional menu options are the two types of question pages. These are linked to the index page where the admin can create, edit, or delete questions

1) Range based questions
2) Text answer questions
